

How to Access Your Passport Package™ Assessment Data – Your Software Credentials

Congratulations! You now have access to your Passport Package™ assessment data in our system. This will let you view the aggregate data from each of the completed assessments, when they are completed by your clients.

You can log into the system here: www.SocialProofDr.com.

Here are your login credentials:

C&J INNOVATIONS

Username: C&J#Team!Demo**

Password: C&J!So*Rocks%%

When you log in, you'll see a dropdown menu at the top that allows you to choose either your Expansion Passport™ or your Walkaway Passport™. You can select with assessment data you would like to see first.

Note that you will be on a page labelled "Step 1." This is the first of several configuration screens. You can just move through these by clicking the red "next" arrows at the bottom of each screen--we'll do all of the configuration for you.

Move forward until you see the red arrow labeled "Results Manager." Click that arrow; on the next page, click "next." You should then see a page labeled, "Detailed Reporting" with a link that says, "Run Summary Report . . ." Click that link to see your data.

You will also be able to access your data dashboard, once that's completed, from the results manager.

If you have any questions, please email us: Clara@CandJInnovations.com.
